& Management Costs while  
Improving Reliability

Growing Your Practice

I.T. Upgrades

### Services for Successful Practices

EDTS offers you the capabilities of a national technology firm, with the service, attention, and focus of a local organization. Services include:

- **HIPAA & Security Awareness Training** – On-demand and in-person training options
- **Risk Assessments** – Evaluate and assess proper steps to take to ensure data safety and regulatory compliance
- **Back-Up & Disaster Recovery** – Ensure that data is always available including rapid recovery of servers in the event of equipment failure or disaster; ensure practice continuity following any emergency
- **Network Optimization** – Evaluate network design, controls and safeguards, identify gaps and prioritize remediation; expansion planning; firewalls; email and groupware solutions; full project management; technology planning and budgeting
- **Managed I.T. Services** – T.R.U.E.™ managed services keep your practice's network healthy and updated for peak performance with 24/7 monitoring, maximizing productivity
- **Policies & Procedures** – Update or establish standards to comply with policies and regulatory requirements, including training and awareness programs for employees and contractors to mitigate risk
- **Cloud Solutions** – Block harmful spam and viruses before they reach your email servers, plus archiving for guaranteed email recovery and continuity

# Experience Dedication Technology Solutions (E.D.T.S.)

## What is T.R.U.E.™?

Our T.R.U.E.™ suite of technology solutions represents a better way of delivering results tailored to your organization's unique needs.

**THOROUGH**  
Complete and comprehensive service

**RELIABLE**  
Dependable, always doing as we say we will do

**ECONOMICAL**  
Affordably priced for less than maintaining an internal resource

**UNINTRUSIVE**  
Minimizing impact on your end users when work is being performed

## DID YOU KNOW?

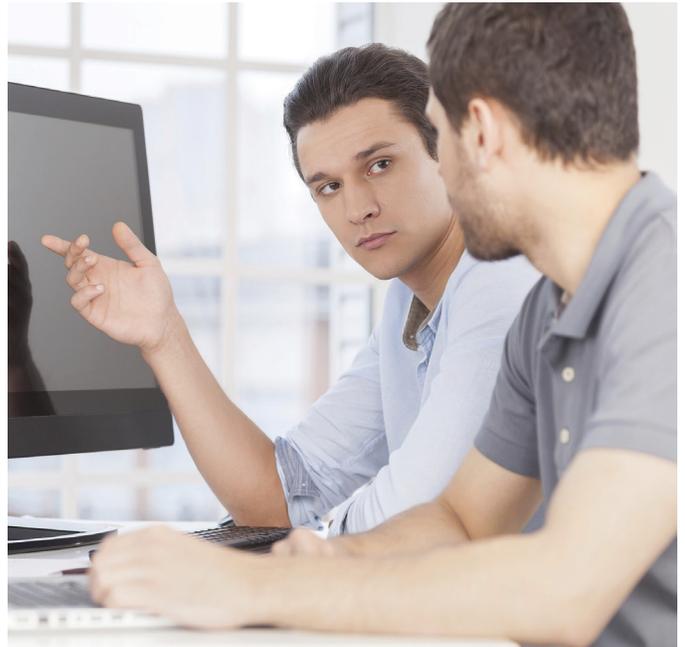

Because medical record theft is not immediately identified by a patient, or their provider, giving criminals years to benefit, stolen health credentials are worth up to **20x** the value of a stolen U.S. credit card.

## About EDTS

EDTS is a regional technology consulting firm that specializes in providing managed I.T. services, network security, and advanced infrastructure solutions to organizations across the Southeast. Founded in 1999, the rapidly growing firm prides itself on remaining current with the latest in emerging technologies, attracting the top talent and increasing clients' profitability, by reducing costs associated with information technology.

Today, EDTS serves clients in the healthcare, manufacturing, distribution, education, nonprofit, governmental, and professional service industries, among others. The company was recently named to the Inc. 5000 Fastest-Growing Private Companies in America for the seventh consecutive year, and to CRN Magazine's 2016 Fast Growth 150 list.
